

## INTRODUCTION

In 1999, VIA revolutionized the veterinary industry by developing the first practice management software with MWL and DICOM integration. Since then, VIA has evolved to help DVMs overcome the challenges of running a successful veterinary clinic in the Digital Age. Unlike outdated PMS, VIA can integrate with most veterinary modalities, so you can purchase new lab equipment without worrying about PMS compatibility. VIA also will save you time by producing SOAP Notes and EMRs in just a few clicks. Let's take a look at five ways VIA is superior to your current PMS.

# **1. INTEGRATES WITH MOST VETERINARY MODALITIES**

Most practice management software can only integrate with a few types of veterinary modalities. As such, veterinarians can only purchase PMS-compatible lab equipment from manufacturers who had partnered with the PMS developer. This allows vendors to charge inflated prices because they know DVMs have limited options. The programmers at VIA took a different approach by designing the PMS to integrate with most veterinary modalities including products from Antech, Abaxis, Idexx, Heska and Scil. This not only saves our clients money, but it also improves patient care because DVMs have more options when purchasing lab equipment.

## **2. SAVES TIME**

Veterinarians without practice management software waste thousands of hours every year by handwriting SOAP Notes, compiling medical records, tracking inventory, and retrieving patient files. Outdated PMS are often so cumbersome that handwriting SOAP Notes is actually faster. With VIA, you can produce SOAP Notes in a matter of seconds. Also, you can populate your Electronic Medical Records template in just a few clicks. DVMs can use the spare time to amplify their revenue by treating more patients.

### **3. COMES OUT-OF-THE-BOX WITH ACCOUNTING AND INVENTORY MANAGEMENT SYSTEMS**

Creating invoices and tracking inventory are time-consuming tasks that many vets perform daily. A small invoicing mistake could cost your practice thousands of dollars, and a minor inventory oversight could leave your practice without the tools, medications, and other essential items for patient care. VIA prevents these issues by automatically tying your medical notes to invoicing and invoicing to inventory. This not only saves you time and money, but it also simplifies the accounting process. In a matter of seconds, you can produce detailed banking and sales reports, which you can analyze to find ways to reduce your overhead, increase your revenue, and boost your profits.

## **4. 24/7 TECHNICAL SUPPORT**

What if your PMS is not letting you retrieve patient files? What if you have issues with payment processing or integrating your PMS with new equipment? At VIA, our Technical Support team is available 24/7 to help you resolve these problems. VIA has been the leading practice management software for more than 15 years, and in that time, we have developed a reputation for high quality and reliability.

## 5. CUSTOMIZABLE FEATURES

Each veterinarian takes a unique approach to patient care and medical records management. As such, there is no such thing as one-size-fits-all practice management software. More DVMs are turning to VIA for its suite of customizable features. You can personalize your SOAP records to incorporate the terminology that you prefer. After you've collected your notes, VIA makes it easy to generate medical history or referral letters. Our software comes out-of-the-box with several types of referral letters, and all you need to do is select the document and print.

## **LEARN MORE ABOUT VIA'S PRACTICE MANAGEMENT SOFTWARE**

While there are a few reasons why a cloud system may be right for your clinic, there are a lot of reasons you may not be thinking about, which might make it wrong for your hospital. A smart network coupled with a highly functional, integrated software such as VIA provides you with all of the accessibility you'd like from virtually anywhere in the world, yet without the worries of security, slow access speed, or long-term costs.

VIA was designed to help veterinarians save time, improve patient care, and go paperless - all of which translate into higher profits. In addition to helping you produce SOAP Notes and Electronic Medical Records, VIA comes with advanced features including payment processing, inventory management, flowsheets, time clock and more.
